

SISTEMI INDUSTRIALI

The noise of silence

In Oil&Gas and Power Generation Market is strictly necessary develop an integrated flexible jacket Passive Fire Protection system based on Client specifications, local rules, particular ambient conditions, Hazardous Areas and End User requirements.

For this reason Sistemi Industriali decided to integrate, in addition to its core Business, Fire rated Blankets System too.

Our blankets are tailor made solution designed and realized in Italy by qualified personnel.

It is a flexible system designed and realized for passive fire protection system for various applications.

Blankets are made to meet customer needs, to facilitate maintenance and reduce assembly time.

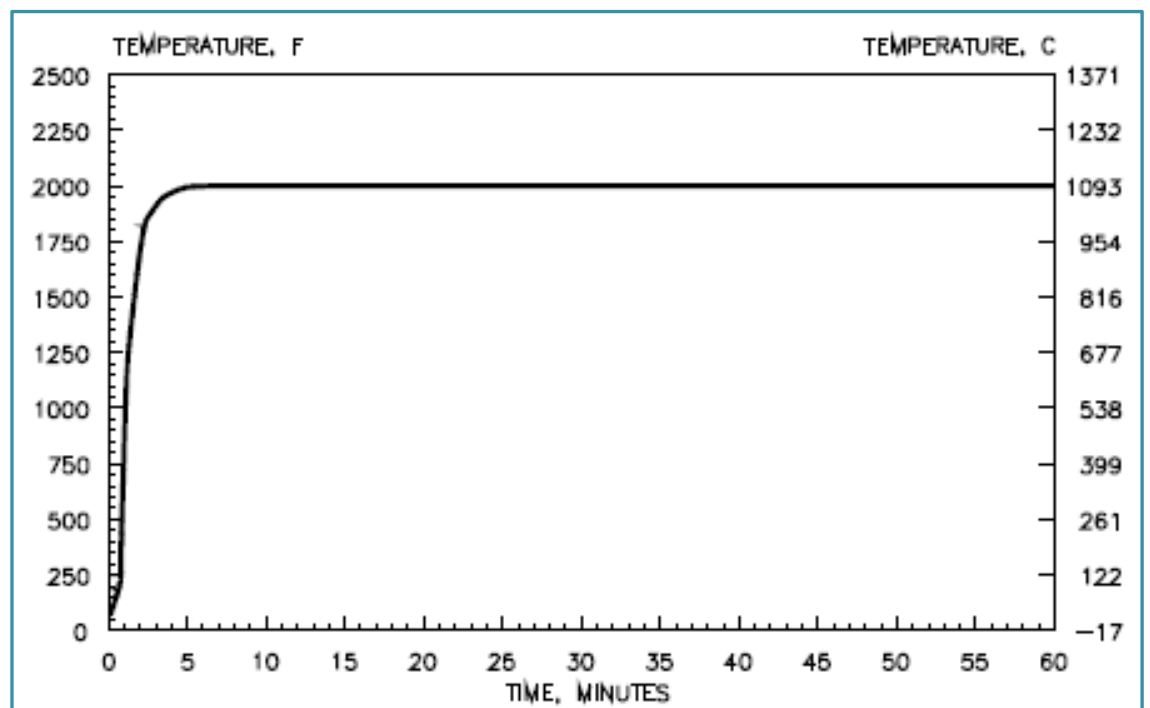

Blankets will be a self-contained insulation system with an integral fastener to allow for easy access, removal and re-installation.

APPLICATIONS: Operated Valves, Valve and Fittings, Process Systems, Equipment, Controls, Cable Trays, Structural Columns.

MARKETS: Oil & Gas, Power Generation , Chemical, Petro Chemical Process.

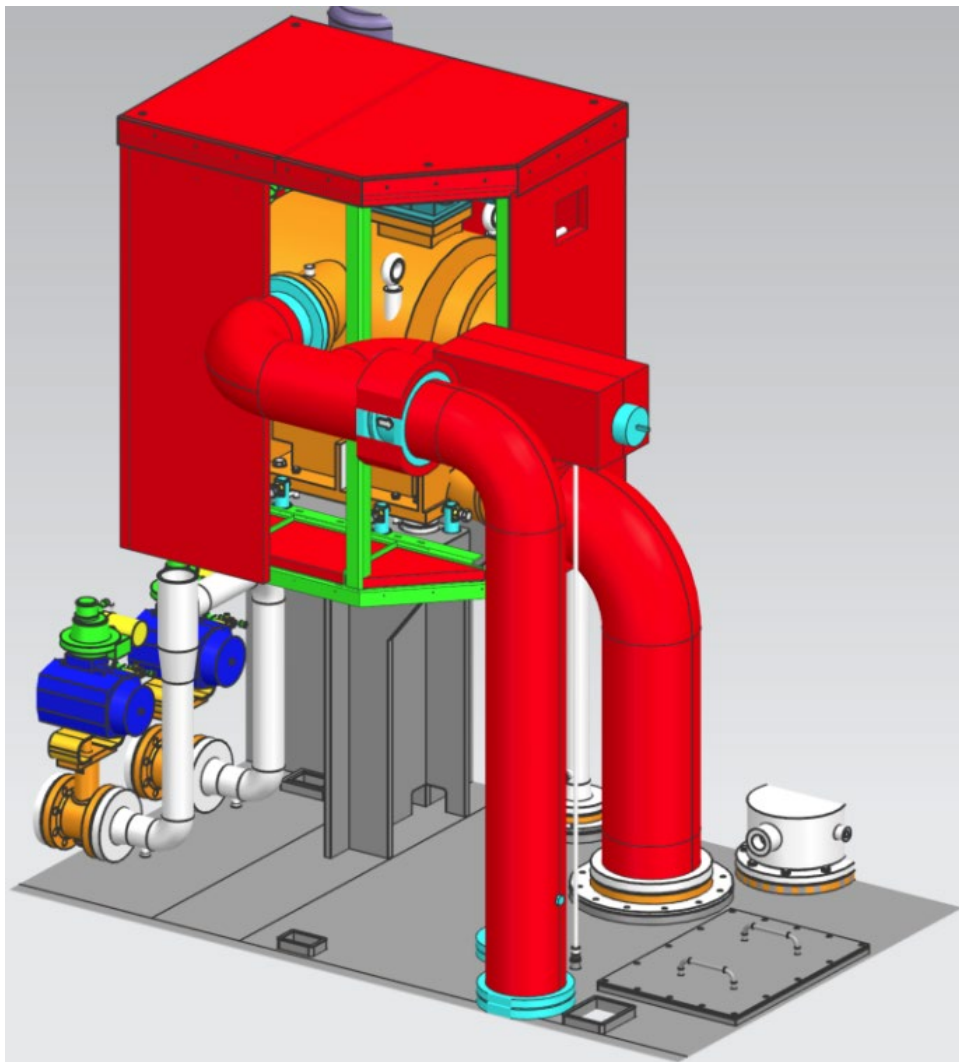

PASSIVE FIRE PROTECTION CERTIFICATIONS:

- Rapid rise fire according **UL 1709**
- Jet fire resistance according **ISO 22899-1**

Blankets characteristics:

- Design and manufactured according to customer need;
- Certified as per international standard;
- Flexible items easy to install;
- Easy Maintenance;
- Removable and reusable in a short time;
- Low maintenance;
- Fire resistant material;
- Acoustic & Thermal insulation;
- Suitable for indoor and outdoor installation;

Our portfolio includes also Rigid Passive Fire Protection system is designed as a high performance solution to meet the most demanding requirements for protection of critical flow and process equipments from Hydrocarbon Pool Fire and Jet Fire conditions.

We design the solution, realized 3D model and then install it in the field.

Offering up to 120 minutes of protection.
